

Medical Forms and Reports

Choose one of the following:

Search the internet and/or your library to find sources for the historical development of chiropractics, Western biomedicine (the one with which you are most familiar) and osteopathy. Prepare a PowerPoint or other media presentation that illustrates the development of the different branches of healthcare.

Create a chart or graph that shows statistics of the popularity of the different areas of medicine, chiropractics and osteopathy (or topic of your choice) with the American public. Present a compare/contrast analysis of your findings. You could easily pick different forms of dieting; approaches to a given treatment plan etc. There are options here and you're only limited by your imagination. Prepare a PowerPoint presentation to share your findings with your peers.

Research the history of the American Nurses Association. Do an in-depth analysis of some of its strategies over the years. How long as it been an organization and what kinds of events made such an association possible? Create a PowerPoint or other media presentation to share your findings with your peers.

Choose one of the encounter forms discussed in this weeks reading and redesign it. Create a PowerPoint that presents the old design, your new design and explains why you made the changes you made.
